

Drake Memorial Library

September 15, 2020

Dear APT committee:

I am writing this letter in support of Logan Rath's application for Librarian.

I have known and worked with Logan as a colleague for over 10 years. Logan has an impressive record in Teaching, Scholarship, and Service.

From a scholarly perspective, Logan is a prolific writer and presenter on library and library interdisciplinary subjects including collaboration with academic departments, introducing technology in the classroom, and online instruction, just to name a few.

Logan's teaching involves the usual traditional in-classroom instruction but Logan has gone out of his way to reach students through implementation of technology in the classroom, imbedding himself in courses, offering synchronous, asynchronous, and hybrid instruction, and making himself available for research consultations for both students and faculty. Logan is always being sought out by students and faculty for help with their library needs.

Logan's service includes his active participation in the SUNY Library Association, the University Faculty Senate – State University of New York, the College Senate - SUNY Brockport, and many college committees.

This past academic year, Logan has shown significant improvement in collaboration with the library faculty and staff. He led a presentation that he, Jennifer Kegler and I gave at SUNY Library Association's annual conference. He is very happy to share his technology skills when asked and has given me and others several individual TEAMS instruction lessons on various topics. This past year our instruction team consisted of only Logan, Jennifer and myself. Logan did the lion's share of instruction and he played an active role in our team meetings – always offering new ways for us to better ourselves.

In conclusion, I'm recommending Logan for tenure at SUNY Brockport and know the college will benefit from having Logan as Librarian.

Should you have questions, please email me at lhacker@brockport.edu or call me at (585) 395-2770.

Sincerely,

Linda Hacker, MSLIS, Med

Associate Librarian
SUNY Brockport
