Hello, you lovely Blackboard people!

I am writing to thank you so much for meeting with me and helping me work out all the complications of the assessment process in front of me for the comp program. It was especially helpful to articulate the issues of anonymity, archiving, and rating reports. I am also happy to tell you that you're off the hook. Logan's recommendation was spot-on and I just came from a very productive meeting with Keith Nobles who uses TK20 for the Professional Education Unit. It will not only accomodate student privacy, but it will also archive the papers and generate an easy reporting system that aggregates the data and reports it by line. In short, hurrah!

Thank you so much for the brainstorming meeting that led me here, and for sharing your expansive knowledge about Blackboard with me! Eternal thanks also to Logan for thinking of TK20--this is going to revolutionize the process for us and save us so much labor, expense, and time.

Meg:)
